CORE SKILLS

Web Development	HTML5	TailwindCSS
Front-End	CSS3	MaterialUI
Development	JavaScript	React-Query
Self-management	ReactJS	VSCode
SCRUM	Redux	ESLint
Figma	GitHub	Prettier
JIRA	GitLab	

SUMMARY

Telecommunications engineering student, since young I had curiosity about softwares, learned a lot navigating on the internet and following Youtube tutorials, learned tools like video and image editors and tools for website development. Starting my career I had the opportunity to work in Intelbras, where i started as a product repair technician, but my focus was development and soon I was invited to work in Intelbras R&D where I started being more in contact with programming languages and dealing with manufacturers, where I could be more in touch with another languages. The opportunity to work as a frontend developer came in a new project in the sector, so I started learning React and other libraries so I could work in the project, the project grew, as did the team and I could participate in the stages of hiring process of the new member, and train the new member to work on the team. I received an invitation to work as a full-stack developer in the company Web Automação e Tecnologia, where I could manage a freelancer team and develop the software for a year. Now I work in a multinational in the laboratorial software, Labware, where I am a Labware consultant.

PROFESSIONAL EXPERIENCE

LABWARE
Labware Consultant

JAN/2023 - NOW

Labware software configuration;
Problem solving.

Technologies: LIMS, ELN, SQL.

WEB AUTOMAÇÃO E TECNOLOGIA
Full-Stack Developer

JAN/2022 - JAN/2023

Requirements analysis;
Backlog creation;
Freelancer management;
UI Design;

Web development;
Mobile development.

Technologies: React, ExpressJS, Vite, MongoDB, React Native, HTML5, CSS3, TailwindCSS, React-Query, JavaScript, ESLint, Prettier, Git, GitHub.
